Ševala Kolak, Manager

Werkkol d.o.o. Kladanj was founded in 1997 in Kladanj. The company focuses on the production of fine underwear for women, men and children. Most of our projects are „lohn“ projects for companies from Germany, Austria and Italy. Nevertheless, we are present at the market of Bosnia and Herzegovina with our own original creations.

„Werkkol“ company has its own new factory with 1500m² of work and warehouse space and it is equipped with modern sewing machines as well as all other required equipment. Since we are mostly working with international companies, closing dates of our projects and delivery of our products are always on time. Efficient and express shipping of our products, as well as necessary experience in the area of export-import management represent some of our qualities.

Fourteen years of experience, trust and excellence made „Werkkol“ company to be seen as a company of high quality and credibility. We are proud to say that we are always ready to embrace new business challenges and cooperation.
